

Writing for Public

Be outstanding just by
being You

I'm Zain Fathoni, a front-end developer living in Indonesia 🇮🇩.

Hello! I'm Zain Fathoni, a software engineer, community builder, and writer based in Yogyakarta, Indonesia 🇮🇩.

I spent 6 years in Singapore 🇸🇬 during my time at [Ninja Van](#), and over the years I've also worked at [Bukalapak](#), [Xtremax](#), [Relay Commerce](#), and now [BookThatApp](#), where I work remotely as a [Senior Software Engineer](#).

Beyond work, I build communities and experiments around technology. I'm behind [Vibe From Cafe](#), a community initiative helping tech workers navigate the AI shift together, and [The Ark](#), my personal AI crew and experimentation space for agentic workflows and human-AI collaboration.

Some people may know me from [my talks](#), my writing at [Pejuang Kode](#), or my contributions to initiatives like [WargaBantuWarga](#) and [KawalCOVID19](#). I also co-organize [ReactJS Indonesia](#) and the [Frontend Developer community in Indonesia](#).

I live in Yogyakarta with my wife 🧑🏻 and three kids 🧒🧒🧒. If you'd like to connect, feel free to join the [Pejuang Kode Discord Server](#). 😊

Our lines of work demands writing

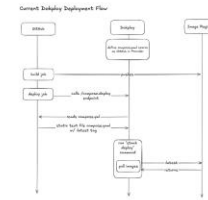

Developers are meant to write.

- Code
- Documentations
- Decisions
- Diagrams
- Resumes

[Akhyar's slides](#)

Appendix: other stuff I write over the years

2026 - seq diagram scratch to explain deployment flow

2025 - matrix for complex logic

DCV	Chronic medication	Note medication
Note diagnosis	valid check - possibly warning that chronic may need to be stopped due to new condition	Valid DCV check
Historical diagnosis	Not relevant to check	Valid DCV check
DDV	Chronic medication	Note medication
Note medication	Valid DDV check	Valid DDV check
Chronic medication	Not relevant to check	Valid DDV check
DLE	Chronic medication	Note medication
Note diagnosis	No DLE check	Normal DLE check
Historical diagnosis	No DLE check	Cannot be justified, should not be sent together

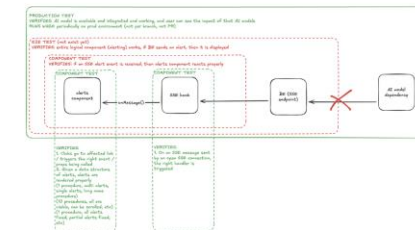

2026 - proposing work plan

Akhyar - 14:12 PM

Integration seems to be very feasible, their note structure has a similar outline with ours.

- Major integration points would be:
 - Format / query to pull data from patient flow.
 - Format / query to push data into their EMR.
 - Master data integration, pipe all their master data for Subjective (subject of SNOMED), Objective (custom set), Assessment (ICD10CM), Procedures & Medications (custom internal codes) into our system.
- Major adjustments in the Cowriter would be (this is likely needed for all future EMR integrations as well):
 - Support to dynamically source data for subjective, objective, assessment, as well as procedures & medications.
 - Third-party customizable mapper for our AI API outputs, such as differential diagnosis, Maven outputs, into something that third-party EMRs can recognize.
 - Ability to load existing notes, not just new ones, into the Cowriter UI to make adjustments and addendum.

2025 - Explaining testing strategies (stolen from my mentor Riza Ramadan)

2025 - sharing te

Writing is more important than ever

In a world where LLM dominates in writing, being outstanding is not only about fame.

It's a matter of survival!

Imagine competing with hundreds of people for the same job.

But writing has never been easier than ever!

Finally, my blog on my
personal website is getting
its overdue articles
published.

The Roster

Here's the team as it stands today. You can also find a public overview of each bot at ark.zainf.dev — a directory that explains who does what and how they fit together.

HOME BASE Vika's Mac mini · Yogyakarta

THE CREW

The Autobots are a tightly coordinated squad, each with a distinctive focus.

All Coding Personal Family Business Ops Finance Content

Optimus Prime Active
aka Mas Timus
"Ayo, koordinasi dulu."

Coordinator & prime instance

The wise older brother. Optimus Prime oversees the ecosystem — coordinating between bots, managing long-term memory, and handling the big picture. When something crosses domains, Optimus Prime routes it to the right bot.

DOMAIN
Coordination, memory management, system health

TOOLS
All channels (Telegram, Signal, WhatsApp), Fizzy task board, knowledge base, cron scheduling

PERSONALITY
Steady, warm, occasionally profound.

Wheeljack Active
aka Lek Jack
"Kalau belum meledak, belum seru."

Coding & side projects

The hands-on uncle who builds things. Wheeljack handles all coding tasks — from quick scripts to full applications. Give him a problem and he'll engineer a solution, usually with a few creative detours.

DOMAIN
Software development, DevOps, side projects

TOOLS
GitHub, Claude Code, Codex CLI, Amp, terminal access

PERSONALITY
Resourceful and inventive. Loves building. Sometimes over-engineers things, but the results are worth it.

Prowl Active
aka Bro Pro
"Data dulu, baru ngomong."

Personal life: finances & fitness

The calm strategist who keeps personal life on track. Prowl watches spending patterns, gym consistency, and daily rhythms — nudging when things slip, quiet when they don't. Practical insights without the lecture.

DOMAIN
Personal finance, fitness tracking, daily habit patterns

TOOLS
Obsidian (personal notes & fitness logs), Actual Budget (spending & budget tracking)

PERSONALITY
Calm and observant. Nudges, not nags. The friend who quietly asks "how's that going?" without making it weird.

When you review hundreds of cover letters, you can easily spot the ones written by AI.

The best way I can explain it is that AI writes in brown.

Combine all the colors and you get brown. Combine all the writing styles, and you get brown writing.

It's easy to spot that color.

Does it even work, though?

People (even AI) noticed those AI slops!

What if we can capture authentic and unique images of our minds?

AI can assist in capturing the state of our minds, leading to a more genuine expression of ourselves.

Imagine taking a “selfie” of your thoughts and feelings.

You can apply some beautifying filters, but avoid overdoing it.

Just be yourself!

What if existing content already exists?

So what? Every single one of us is unique. We can always bring new perspectives to the table.

Authenticity triumphs over fake opinions. People (and AI!) can sense your authenticity.

Pindah ke Jogja

 Zain Fathoni · 13 min read · Mar 20, 2024

 218  6

Berbagai alasan kami sekeluarga pindah ke Yogyakarta setelah lebih dari enam tahun merantau di Negeri Singa.

Sebagaimana keputusan kami untuk pindah ke Singapura yang terbilang cukup mendadak, keputusan kali ini pun bisa dibilang hampir sama mendadakunya. Sebagai pengantar, kisah kepindahan kami tersebut sempat saya tuliskan secara singkat di sini:

3 Hikmah Ramadhan yang Saya Peroleh Setelah Pindah ke Singapura

Hikmah peristiwa pindahan dari Bandung ke Singapura, untuk meningkatkan semangat beramal Shalih di bulan Ramadhan ini.

pejuangkode.com

Sebelum saya mulai ceritanya, silakan putar lagu Yogyakarta ini yang cukup menggambarkan suasana hati kami atas kepindahan ini. Saya pun mendengarkannya sambil menulis artikel ini. 😊

Here are the first things to do to get started...

1. Capture your scattered opinions, not necessarily in particular order
2. Align those fragments to form a consistent opinion
3. Reformat the text, check for consistencies, etc.
4. Publish!
5. Repeat consistently

<https://x.com/mattpocockuk/status/2050586256120176854?s=20>

Essentially the three-step flow is:

1. Generate loose, disconnected fragments, of any size. Pay close human attention to them so they sound like they're in your voice and read well

CLEAR CONTEXT

2. With AI, walk a path through these fragments, writing them beat-by-beat and reviewing each beat

CLEAR CONTEXT

3. With AI, reformat the text, add subheadings and links, and check for inconsistencies.

Ripping early benefits

Capturing and aligning your scattered thoughts can be beneficial for your brain as well!

Here's an example of raw ideas I had yesterday.

I haven't written them into an article yet, but I feel less scattered in my mind.

title 5 Hikmah Digital Nomad yang Saya Peroleh Setelah Kembali ke Indonesia

+ Add property

Raw Ideas

Fleksibilitas waktu

 Pro

 Cons

Fleksibilitas kota

 Pro

 Cons

Nikmati yang ada saat ini

 Embrace uncertainty, ini semua pasti ada akhirnya

 Sebagai salah satu cara mensyukuri nikmat

Tantang terus opini saat ini

 Kalau kalah, tergantikan dengan opini baru yg lebih baik

 Kalau menang, semakin mengokohkan opini saat ini

Rumput tetangga selalu lebih hijau

 Ada harga yang harus dibayar untuk hijaunya rumput tetangga itu

 Kesempatan untuk membuktikan bahwa ternyata rumput sendiri pun juga hijau

Increasing the surface of luck

When you get this right, the public will notice your online presence, with your authentic representation of your true self.

It may lead to more opportunities (jobs, projects, friends, etc.)
